A PARKLAND VARIETY

MARKET OUTLETS

Fresh market

A round purple skinned and fleshed variety is the first purple variety in the Parkland Seed Potatoes Ltd collection.

- ▶ A Parkland potato variety with Purple skin and flesh that holds its color after cooking.
- ▶ It is a high yielding, mid-season variety with a uniform size and shape. It has good boil and bake scores and a low incidence of hollow heart. Preliminary studies have also shown moderate resistance to foliar late blight and common scab.

CHARACTERISTICS

Info

Average yield: high
Crossing: Congo x FO2041

Quality

Tuber shape: round
Uniform of shape: uniform
Eye depth: moderate
Flesh colour: purple
Skin colour: purple

Agronomy

Dormancy: medium
Tube number: higher setting
Resistant to damage: susceptible
Secondary growth: not susceptible
Flower colour: purple

Disease resistance

Common scab: moderate resistance

How to grow

Cultivation recommendation

Ensure proper skin set prior to digging. Slightly susceptible to harvest damage so dig with care.
