

# Libero.

## MARKET OUTLETS

Fresh market, processing

Libero is a early maturing variety well suited for the fresh market with good frying capabilities.

- ▶ A Parkland potato variety with smooth russet skin well suited for the fresh market.
- ▶ Tubers are long-oval with a uniform russet skin and light yellow flesh color. Baked, roasted, boiled, mashed, or as fresh cut fries the Libero can do it all.

## CHARACTERISTICS

### Info

**Maturity:** medium early

**Average yield:** average

**Crossing:** AR 98-0813 x Innovator

**Breeder:** Lantmännen Seed B.V.

### Quality

**Tuber shape:** long oval

**Eye depth:** shallow

**Flesh colour:** light yellow

**Skin colour:** russet

**Dry matter test:** excellent

**Dry matter percent:** 22.1%

### Agronomy

**Dormancy:** long

**Tube number:** average

**Resistant to damage:** somewhat susceptible

**Resistant to bruising:** good

**Secondary growth:** quite sensitive

**Flower colour:** purple

### Disease resistance

**Late blight (Foliage blight):** somewhat susceptible

**Common scab:** quite resistant

**Virus PVY:** good resistance

**Tuber blight:** slightly susceptible

**PCN - Ro1 & Ro4:** resistant

**Virus Yntn:** good resistance

**Fusarium (dry rot):** good resistance

**Leaf roll virus:** very resistant

## How to grow

### Cultivation recommendation

Wait at least 3 weeks after haulm killing before harvesting to minimize harvest damage.
