

Roko.

MARKET OUTLETS
Pre-pack, fresh market

The Roko is a mid to late maturing fresh market variety with good yields.

- ▶ A Parkland seed potato variety with excellent virus resistance.
- ▶ Roko tubers are uniform, oval round shaped and have shallow eyes. The skin is smooth, deep red in colour and the flesh colour is white. Cooking type is rather floury and the dry matter content is moderate. Roko has excellent virus resistance.

CHARACTERISTICS

Info

Maturity: mid to late
Average yield: very good
Crossing: Alwara x MA81-0536
Breeder: Nieder Österreichische Saatbaugenossenschaft

Quality

Tuber shape: oval round
Uniform of shape: uniform
Eye depth: shallow
Flesh colour: white
Skin colour: red
Dry matter test: moderate
Dry matter percent: 22.7%

Agronomy

Dormancy: long
Tube number: average
Resistant to damage: good resistance
Resistant to bruising: good resistance
Secondary growth: not susceptible
Flower colour: purple

Disease resistance

Late blight (Foliage blight): somewhat resistant
Common scab: somewhat susceptible
Virus PVY: excellent resistance
Tuber blight: moderate resistance
PCN - Ro1 & Ro4: resistant
Blackleg: moderate resistance
Virus Yntn: good resistance
Fusarium (dry rot): good resistance

How to grow

Resistance

Excellent resistance to some viruses.
