

Ballerina.

MARKET OUTLETS

Fresh market

Ballerina is an early ripening, firm cooking and very tasty consumption potato.

- ▶ A Parkland potato variety with smooth skin and great flavour.
- ▶ Oval shaped with a bright smooth skin. Ballerina can be packed right off the field or stored for long periods without bruising.

CHARACTERISTICS

Info

Maturity: medium early

Average yield: high

Breeder: Danespo

Quality

Tuber shape: oval

Uniform of shape: uniform

Eye depth: shallow

Flesh colour: yellow

Skin colour: yellow

Dry matter test: moderate

Dry matter percent: 19%

Agronomy

Dormancy: long

Tube number: 12 to 15

Resistant to damage: good

Resistant to bruising: good

Secondary growth: rare

Disease resistance

Late blight (Foliage blight): average resistance

Common scab: good resistance

Virus PVY: good resistance

PCN - Ro1 & Ro4: good resistance

Virus Yntn: good resistance

Fusarium (dry rot): good resistance

Leaf roll virus: good resistance

How to grow

Storage recommendation

Very good storability, up to 7-8 months. Import to check underwater weight. Minimum of 320 to maximize storage length.

Cultivation recommendation

Fertilize at medium levels. Slower emerging variety, therefore plant into warm soil and protect against rhizoctonia. Tubers bulk quickly at end of growing period. Check frequently to ensure desired size profile. Unsure good skin set before digging.
