CHARACTERISTICS

Info

Maturity: early

Average yield: high

Crossing: UK90-60-27 x White Lady

Breeder: Agrico Research B.V.

Quality

Tuber shape: round-oval

Uniform of shape: uniform

Eye depth: shallow

Flesh colour: white

Skin colour: white

Dry matter percent: 17.9%

Agronomy

Dormancy: short

Tube number: average

Resistant to damage: good resistance

Resistant to bruising: good resistance

Secondary growth: not susceptible

Flower colour: light purple

Disease resistance

Late blight (Foliage blight): moderate resistance

Common scab: slightly susceptible

Virus PVY: moderate resistance

Tuber blight: slightly susceptible

PCN - Ro1 & Ro4: resistant

PCN - Pallida: susceptible

Blackleg: moderate susceptible

Virus Yntn: moderate resistance

Fusarium (dry rot): slightly resistance

How to grow

Storage recommendation

Volare has a short dormancy and is therefore not suitable for long term storage.

Cultivation recommendation

Volare bulks rapidly at end of the season. Ensure frequent test digs to capitalize on target market.

Resistance

Volare is a little susceptible to common scab. Resistance to virus Yn is good. Volare is resistant to PCN Ro1 and Ro4.
