

Constance.

MARKET OUTLETS

Fresh market "A" size

Constance is a yellow-skinned, pale yellow fleshed table potato, suitable for general use.

- ▶ A Parkland potato variety ideal for mashing, boiling or baking.
- ▶ With early development after planting, this is a good early maincrop variety, with oval round tubers of regular shape and shallow eyes.

CHARACTERISTICS

Info

Maturity: early

Average yield: very good

Crossing: Marabel x AR93-1243

Breeder: J.L. Spijkman

Quality

Tuber shape: oval round

Uniform of shape: uniform

Eye depth: shallow

Flesh colour: light yellow

Skin colour: yellow

Dry matter percent: 19.7%

Agronomy

Dormancy: long

Tube number: moderate

Resistant to damage: moderate

Resistant to bruising: moderate

Secondary growth: not susceptible

Flower colour: white

Disease resistance

Late blight (Foliage blight): susceptible

Common scab: very good resistance

Virus PVY: very good resistance

Virus Yntn: very good resistance

Fusarium (dry rot): moderate resistance

How to grow

Cultivation recommendation

"Regular nitrogen is acceptable; use higher amounts of phosphorus than normal. Vine killing - For best results , use 1/2 rate. Plants should be senescing. For best results for skin set/ skin finish, harvest 3 weeks after vine kill.

Plant shallow to prevent tuber damage at harvest (ideally 5"). For best results continue to feed nitrogen throughout the season."
