

Arizona.

MARKET OUTLETS

Fresh market "A" size

Arizona produces exceptionally high yields of large, uniform tubers which make it perfectly suited for the main market category.

- ▶ A Parkland potato variety which grows in almost all soil types.
- ▶ This early-maturing, fresh market variety has smooth yellow skin and light-yellow flesh, grows in almost all soil types, and has great heat tolerance.

CHARACTERISTICS

Info

Maturity: early

Average yield: high

Crossing: UK150-19D22 x Mascotte

Breeder: Agrico Research B.V.

Quality

Tuber shape: oval

Uniform of shape: uniform

Eye depth: shallow

Flesh colour: pale yellow

Skin colour: yellow

Dry matter percent: 17%

Agronomy

Dormancy: medium

Tube number: low setting

Resistant to damage: good resistance

Resistant to bruising: very good resistance

Secondary growth: not susceptible

Flower colour: white

Disease resistance

Late blight (Foliage blight): moderate resistance

Common scab: slightly resistance

Virus PVY: good resistance

Tuber blight: good resistance

PCN - Ro1 & Ro4: resistant

PCN - Pallida: susceptible

Blackleg: slightly resistance

Virus Yntn: very good resistance

Fusarium (dry rot): moderate resistance

Leaf roll virus: moderate resistance

How to grow

Storage recommendation

Arizona has quite a good dormancy and is therefore suitable for longer storage periods at 5°C.

Cultivation recommendation

It is recommended to warm seed prior to planting. Arizona is sensitive to Sencor - do not use post-emergence; it will affect the set negatively. Do not de-sprout more than once.

Resistance

Arizona is slightly resistant to common scab.

Its resistance to tuber blight, virus Yntn, and virus Yn is good. Arizona is resistant to PCN Ro1 and Ro4.
